## Yume series Backwash Drain Rotary Type/Head bath

*this is a new hairdressing service where the head is completely immersed in a sink filled with warm water while the hair is washed and rinsed with hot and warm water. The experience offers customers a pleasant relaxation that cannot be experienced in everyday life. This was originally a bathing technique used in the thermal spring areas of Akita Prefecture. However, when attempts were made to replicate the technique in hair salons, it was not possible to dip the back of the head deeper than to the ears, as a result of which the essential comfort of a head bath could not be achieved. By adding a water leak over the hairline of the forehead, we have developed a device that offers customers a new physical experience that only salons can offer through full head hot bath effects*

H:SC-AY- YHBYMS Yume series Backwash Drain Rotary Type

RRP 1.350,00 Euro

*Buy 1 x Head Bath and get for free*
